SKILLS

Languages:	Javascript, Typescript, Python, Java, Golang, Kotlin, Rust, C++, C#, pgSQL
Platforms:	GCP, GSC, Convex, Posthog, Plausible, Github, Sentry, Kubernetes, AWS, Firebase
Tools:	Postgres, Docker, Bun, Vim, FFmpeg, SQLite, Redis, Ollama, Linux
Frameworks:	Clerk, React, React Native, tRPC, Drizzle, Wails, NextJS, Svelte, Actix, Fiber
Soft Skills:	Communication, Leadership, Teamwork, Social Media Marketing, Analytical Thinking

PROJECTS

Social Media Automation Pipeline <i>Golang, Docker, AWS, FFMPEG, AI, ML</i>	May' 26
- Designed a high-performance, AI Powered, automated CLI pipeline for concurrent video downloading, audio-visual merging, and looped content creation. - Engineered in Go for concurrent CPU/IO-bound orchestration using Cobra; leveraged FFmpeg for demuxing, integrated YouTube Data API v3 with OAuth2, caching, Docker. - Scaled 7 organic channels via automated content generation, reaching 3.52M+ views, 260K+ watch hours, and 15.3K+ subscribers.	
X11 Compositor Window Manager <i>C, X11, CMake, Linux, DSA</i>	June' 26
- Designed and developed a dynamic tiling window manager for X11 from the ground up, focusing on minimalism, source-level configurability, and extreme performance. - Architected the core window management logic using Xlib, implemented dynamic tiling algorithms, and engineered a native C status bar for real-time hardware monitoring. - Delivered an ultra-low-latency, lightweight desktop environment with a 12 MB memory footprint, significantly accelerating keyboard-driven multitasking workflows.	
Android Notification Tracker <i>Kotlin, AI, Postgres, SQLite, numpy, Jetpack Compose, Gradle</i>	June' 26
- Designed an app that automatically saves your notifications, while using AI to summarize daily clutter and using data science to provide insights to help you not lose any data. - Architected an offline-first cache strategy with MVVP architecture, Jetpack Compose & Kotlin Async, a custom SQLite engine, with AI summaries, and real-time Postgres synchronization. - Ensured 99.99% recovery with zero data loss and sub-second UI rendering, delivering a battery-optimized offline-first experience processing 100,000+ background events daily.	

ACHIEVEMENTS

- Got First Place, Inter-College ITM Hackathon Gorakhpur: Secured 1st place competing as a solo developer against teams of six, demonstrating full-stack autonomy and rapid execution.
- 3rd Place, National Space Day Debate: Achieved 3rd place in a campus-wide debate competition, demonstrating strong public speaking and argumentation skills.

EXPERIENCE

IGNITE (Sports Club)

- Orchestrated real-time broadcast production using OBS Studio, implementing complex scene transitions, dynamic overlays, and multi-source compositing to deliver a professional-grade live stream for a high-traffic cricket auction.
- Optimized streaming performance and audience interaction, driving a **56% increase** in concurrent viewer metrics and a steady **16% subscribers** growth through data-driven engagement strategies.

EDUCATION

Lovely Professional University Bachelor of Technology Computer Science and Engineering; CGPA: 8.56	Phagwara, Punjab Aug' 25 – Present
Don Bosco Senior Secondary School Intermediate Percentage: 69%	Gorakhpur, UP Mar' 24 – May' 25
